

TRESCO 3600 SERIES

KEY BENEFITS

Ergonomics

Tresco is guided by ISO 11064 best practices, equipped with 40 years of control room design experience, and committed to tailoring ergonomic solutions to every client's control room needs.

Durability

In Year 10, your console should function just like it did on Day 1. Structured with heavy duty 12 gauge steel frames and precision cut by computer numerically controlled machines, Tresco consoles are built to last.

Power and Storage

Our electrical and data solutions allow your operators to easily plug in and power up. Equipment mounting and storage is integrated into the console with quick release hinges to give you front and rear access.

Customization

Whatever the size, shape, and purpose of your control room, the 3600 series console provides streamlined functionality.

Sustainability

Tresco products are composed of environmentally friendly materials, including cold rolled steel with a minimum of 30% recycled content and composite wood products with 100% recycled and/or recovered content.

Easy installation

Tresco's certified installation team is committed to getting your consoles ready to go as soon as possible.

KEY FEATURES

1. Curved worksurface

Particleboard core with high pressure plastic laminate surface. Impact and scratch resistant. Waterfall shaped nosing. Upgrade to acrylic solid surface facing available.

2. Exterior panels

Conceals and secures interior equipment. Easy access to equipment through front or rear panels, without the use of tools.

3. Multifunctional backwall*

Flexible equipment mounting surface. Increases operator privacy while reducing control room cross noise. Sound-absorbing fabric wrapped acoustic panels are a standard feature. Slatwall option available.

4. Pedestal*

Mobile or fixed set of drawers for extra storage needs. Individual drawer lock or gang locking available. Different handle options available.

5. Monitor mounting

VESA® compatible mounting solutions for any number, size, and configuration of monitors.

6. Convenience outlets*

Various configurations of power and data ports possible. Backwall mounted or worksurface mounted options available.

*Optional

KEY FEATURES cont.

1. Frame

12-gauge cold rolled steel with powdercoat finish. Built for 24/7 use. Lifetime warranty. Optional height-adjustability.

2. Equipment storage*

Sliding trays provide easy access to equipment. Tray load rating is 90 lbs (heavy duty rails with 150 lbs load rating also available).

3. Cable management

Cable Grommet allows power and data cables to route to the work surface without fraying. Internal, horizontal raceways keep cables protected.

4. Ventilation*

Perforated rear accent strip provides passive ventilation for equipment within console. Optional ventilation fan provides active ventilation.

5. Levelers and Kick plate

Adjustable levelers accommodate uneven floors. Kick Plate protects exterior panels from impact of operator's feet or chairs

6. Electrical*

Flexible electrical solutions. Standard: surge protected power strip with moulded plug end/hardwired to a junction box. 4-8 Receptacle configurations available in any N. American or International type.

*Optional

INDUSTRY STANDARDS

Tresco is proud to design in accordance with the following standards and industry best practices:

- ISO 11064 Ergonomic design of control centers
- ANSI/HFES 100-2007 Human Factors Engineering Computer Workstations
- Power distribution solutions CSA approved and/or UL Listed
- All electronics developed by Tresco are FCC certified

Console designs can also be tested to meet your unique requirements, including BIFMA, seismic, military, and marine standards.
